

Navyakosh Bio-Fertiliser For Avocado

Our fertilizers are formulated using microorganisms, nanoparticles, and biopolymers to:

- Reduce farming investment and irrigation demand
- Increase crop yield
- Enhance soil microbial count and organic matter

For avocado farming, Navyakosh is not just a fertilizer — it is a soil and plant performance enhancer that supports: Strong root systems Better flowering and fruiting Higher quality yields Long-term orchard sustainability

BENEFITS:

- 15-35% increase in yield.
- 48% reduction in agricultural investment.
- 33% reduction in demand for irrigation.
- It contains 9 factors (N, P, K, C, Zn, S, Fe, Cu, Mn).
- Active microorganism and superabsorbent biopolymers .
- 100% organic.
- 5-8% reduction in crop duration cycle.

NUTRIENTS REQUIRED

- Nitrogen(N)
- Phosphorus(P)
- Potassium(K),
- Magnesium(Mg)
- Zinc(Zn)
- Iron(Fe)
- Manganese(Mn)
- Boron(B)

MAJOR MICROBES:

- Mycorrhiza (VAM),
- Phosphate solubilizing bacteria,
- Azospirillum ,
- Potassium Mobilizing
- BioFertiliser (KMB)

HOW TO USE

- Apply to each bearing trees 4-5 kg of Processed Navyakosh Fertilizer/ tree/ year.
- To trees less than five years old, half of the above dose is recommended.
- fertilizer is applied in a basin of 0.75-1.00 m radius around the tree to a depth of 20 - 30 cm.
- This fertilizer is required once throughout the crop cycle and the microorganisms available in the fertilizer will get active and helps plant to utilize all macro as well as micro nutrient throughout the crop cycle.
