

# Navyakosh Bio-Fertiliser For Rice

Navyoksh Fertilizer is a 100% organic, crop-specific fertilizer that helps farmers reduce costs, save water, and increase yields. It can lower farming expenses by up to 48% and reduce irrigation needs by up to 33% compared to conventional fertilizers.

Its special blend of beneficial microbes releases essential nutrients naturally from the first day of application, improving soil fertility and supporting healthy crop growth.

## **Nutrients:** Nutrients Provided:

Nitrogen (N), Phosphorus (P), Potassium (K), Sulphur (S), Calcium (Ca), and Magnesium (Mg).

## BENEFITS:

- 48% reduction in agricultural investment.
- 33% reduction in demand for irrigation.
- It contains 9 factors (N, P, K, C, Zn, S, Fe, Cu, Mn).
- Active microorganisms and superabsorbent biopolymers.
- 5-8% reduction in crop duration cycle.

## NUTRIENTS REQUIRED

- Nitrogen(N)
- Phosphorus(P)
- Potassium(K)
- Calcium(Ca)
- Magnesium(Mg)
- Sulphur(S)
- Zinc(Zn)
- Iron(Fe)

## MAJOR MICROBES:

- Blue-green algae (anabaena)
- Azo la
- Pseudomonas fluorescens
- Potassium solubilizing bacteria (KSB)

## HOW TO USE:

- Use Navyakosh fertilizer by broadcasting it evenly across the field.
- Apply 3-4 bags (50 kg each) per acre of land.
- Apply during land preparation only (before planting).
- Apply once per crop cycle.
- The active microorganisms in the fertilizer become active in the soil.
- These microorganisms help plants absorb both macro and micro nutrients throughout the crop cycle.
